

ORLANDO SHELTER

Visual Kennel Blockers

- Install visual blockers on the lower half of kennel fronts to limit cage reactivity and overstimulation. We are open to ideas on what material to use- it must be durable and easily sanitized. The material used must secure to the kennel door of each kennel by hooks and able to be removed if needed.

Doggy Mailboxes

- Install Mailboxes on the front of each dog kennel to keep that dog's information all in one place and easy for a potential adopter to learn more about the dog in front of them! We need a minimum of 35 mailboxes. You can view and purchase the mailboxes [HERE!](#)

DOG Kuranda Beds

- We like to provide our cats with areas to hide and climb in their cage while they wait for their new home. Kuranda Beds are an easy DIY project, and great for shelters because they are easily sanitized. Learn more [HERE.](#)

Dutch Door

- We need a dutch door purchased and installed in the back of our facility to prevent dogs from getting to the rear parking lot if they accidentally get out of their kennel.

Photo props/backdrops

- Photo props to get more fun pictures for social media for our pets

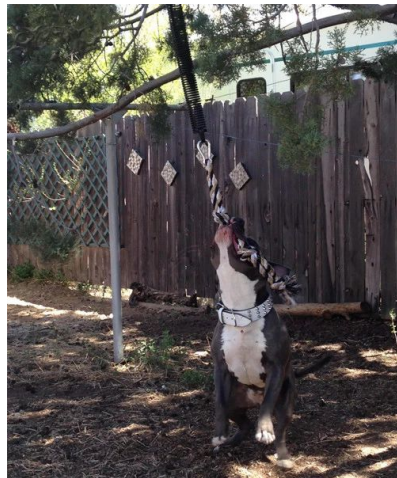

CHILL & SWINGS

- To hang in two of our play yards and provide the dogs with a play on or to chill out.
- Swing is 21 in. wide and 43 in
- Rope used should be able

Spring Toys

- To hang in two of our play yards and provide Enrichment and tug activities
- Need to be able to hook and unhook them from the agility yard poles
- Rope used should be able
- Ideally have 4 to hang, can use ropes or tires
- Rope should be feet

Interactive Dog Feeder Toy

- Drill holes in PVC Pipes and cap them off. Will be used for enrichment for the dogs in kennels.

SANFORD SHELTER

Shading for Play Yards

- Our volunteers exercise our shelter dogs daily in the play yards, and they need adequate shading to stay cool. We need outdoor yard shading to complete this project. Shading for Play Yards

Visual Kennel Blockers

- Install visual blockers on the lower half of kennel fronts to limit cage reactivity and overstimulation. We are open to ideas on what material to use- it must be durable and easily sanitized. The material used must secure to the kennel door of each kennel and be able to be removed if needed.

Cat Kuranda Beds
